

SPECIFICATION SHEET

Electronic Ultrasonic Pest Insect Mosquito Repeller

Product Description:

Electronic Ultrasonic Pest Insect Mosquito Repeller

1.Range:50-80sqm 2.No chemicals 3.Safe to human and pets

How to use:

After plugging the power on the wall,you can see the blue indicator light and the machine begin to work.Also you can hear electronic scanning sound from high frequency to low frequency.The frequency selected switch is on the left side,when you turn it to "H",it can lustrate small vermin,such as mosquito,black beetle,fly etc.;when you turn to "L",it can lustrate mouse.Then the vermin will disappear in several days,and you will never buy dangerous chemical medicine and clean the mouse cage!

Input:AC 110V - 220V,50Hz - 60Hz

Power:2.5W

Usefulness area:about 50-80 square meter (It is affected by the installing point and surroundings)

Caution:

1. This machine should be installed at 30-80cm away from the floor,and should be vertical to the floor and plug to the power socket
- 2.The installing point should be away from carpet,curtain etc.,or else,the effect of lustrating vermin will be weakened
- 3.It is normal that the vermin will increase at the beginning of the using days,because they will get away from their living place after the attack of the ultrasonic
- 4.Forbidden:water,moisture,strong impregnant;Do not make striking on it
To increase the effect,you should use several machines at the warehouse or goods pile-up,several rooms

CHANGZHOU WUJIN KAILI ELECTRONIC FACTORY

Effect Range:

- 1.This machine will have great effect in 50-80 square meters in the room.
- 2.This machine can lustrate house mouse, black beetle, mosquito, flea, fly, cricket, ant, wood ant etc vermin. So we can call it electronic lustrate mouse machine, electronic helminthes machine etc.
- 3.The ultrasonic that sent out from this machine is far away from hearing range of human being. They will not do harm to human being and pets. Also will not have affect on house machine.
- 4.This machine is safety and environment protected. Smell-less and flavorless.
- 5.Teeny used energy. (Total power<1W) and with advance photoelectron technology.

Specifications:

- 1.Voltage: 110 - 220V
- 2.Frequency: 50Hz - 60Hz
- 3.Power: 2.5W
- 4.LED indicator light
- 5.Easy one button operation
- 6.Dimensions: 10 x5.2x 2.5cm (LxWxT)
- 7.Neutral white design

Carton size : 42X42X43 CM /100 PCS The total weight 9 KG .

Effect Range:

1. this machine will have great effect in 50-80 square meters in the room.
2. this machine can lustrate house mouse, black beetle, mosquito, flea, fly, cricket, ant, wood ant etc vermin. So we can call it electronic lustrate mouse machine, electronic helminthes machine etc.
3. the ultrasonic that sent out from this machine is far away from hearing range of humans being. They will not do harm to human being and pets. Also will not have affect on house machine.
4. this machine is safety and environment protected. Smell-less and flavorless. Teeny used energy. (Total power<1W) and with advance photoelectron technology.

How to use:

After plugging the power on the wall, you can see the blue indicator light and the machine begin to work. Also you can hear electronic scanning sound from high frequency to low frequency. The frequency selected power is on the left side. When you turn it to "H", it can lustrate mosquito, black beetle etc small vermin. When you turn to "L", it can lustrate mouse. Please select it as products' actually function, you will find its effect in several days. The mouse decreases a lot. Maybe you will find the hexapod increase a little at the beginning use period. Because the ultrasonic evict them from the hiding place. And they will disappear in short time. In 2-4 weeks, you are no need to worry about mouse and vermin. Good situation will keep if you let the machine work all the time. But it just costs you a little for one year. You are no need to buy dang cross chemical medicine and clean the mouse cage.

How to use:

Step	Action	Frequency	Target
1	Pick up the machine from the packing card.		
2	And then plug it power socket.		
3	Select the working frequency that you need.	H	Small vermin (mosquito, black beetle, etc.)
4	Put the machine above 100cm away from the floor.	L	Mouse

Main caution:

1. this machine should be installed at 20-80 centimeter away from the floor. And should be vertical. To the floor and plug to the power socket.
2. the installing point should be avoided from carpet, curtain etc attaching sound material. Or else, the decrease of the sound pressure will do harm on the helminthes effect.
3. it's normal that the mouse and vermin will increase at the beginning of the using days. Because they will get away from their living place after the attack of the ultrasonic.
4. this machine can be plug directly to AC 220V (or 110V) power socket. (Power range: AC90 V-250V, Frequency: 50HZ-60HZ)
5. Caution: moisture proof, waterproof.
6. Don't clean the machine by strong impregnant, water or damp cloth. Use dry and soft cloth with some neuter wash to clean the machine.
7. Don't drop the machine and make strong striking on it.
8. using environment temperature: 0-40℃.
9. To increase the effect, you should use several sets machine at the warehouse or goods pile-up, several rooms.
